

SPLASH PADS

Made from 100% Recycled Rubber

Stays in place

Looks great for years

Balanced weight won't sink against wall

Winds won't blow it away

Last for years

Handles heavy rain with ease

Redirect Water – Beautifully!

Protect your home or business with Shercom's Rubber Splash Pad, a durable, flexible, and stylish solution designed to direct water away from your foundation. Made from high-quality recycled rubber, this splash pad is built to last, handling heavy rainfall with ease while maintaining its sleek appearance for years.

Key Features:

- **Long-lasting durability:** Won't crack or degrade like plastic or concrete alternatives.
- **Stays in place:** Balanced weight ensures it won't sink against your wall or get blown away by strong winds.
- **Foundation safe:** Lightweight and flexible, preventing damage to foundations while still heavy enough to stay secure.
- **Pest deterrent:** Discourages insects and rodents from nesting around your home.
- **Low-maintenance beauty:** Its sleek grey design complements any exterior and won't fade or wear down over time.
